About Us

MFT Trading and Contracting is a company committed to delivering high-quality contracting services across KSA. We operate in Civil, Mechanical, Electrical, HVAC, Fabrication, Scaffolding, and Security domains — serving commercial, industrial, and project-based clients with reliability, precision, and speed. Our strength lies in technically qualified teams, strong supplier relationships, and a commitment to delivering on time without compromising quality.

»» Our Vision AND Mission

To be the preferred contracting partner — known for quality, reliability, and trusted execution.

To meet client requirements with flexibility, competitive pricing, and timely delivery — while maintaining the highest standards of quality and business ethics.

Sectors We Serve

- Construction & Infrastructure
- Oil & Gas
- Marine & Shipping
- Industrial & Manufacturing
- Commercial & Residential

Our Services

01

Civil Works

Structural, finishing, and fit-out works delivered by technically qualified teams.

02

Scaffolding Supply & Works

Supply and installation of scaffolding across commercial, industrial, and residential projects.

03

Fence & Gate

Perimeter and security fencing solutions for industrial, commercial, and residential needs.

04

HVAC Services

Installation, maintenance, and troubleshooting of HVAC systems across all building types.

Our Services

05

Security Systems

CCTV, access control, and integrated electronic security and automation solutions.

06

Mechanical Works

Industrial mechanical maintenance, installation, and repair using the latest technology.

07

Support Services

Technical support and measuring services with fast response from inquiry to delivery.

08

Fabrication

Workshop-based production facility handling jobs of all sizes designed, drafted, and detailed to specification.

Service Overview

The following summarizes the contracting service areas MFT covers — each supported by qualified field teams, quality materials, and project management capabilities.

Civil Works

Our civil works team delivers structural, finishing, and fit-out works across commercial, industrial, and residential projects. From foundations to final finishes, we ensure every job is completed to specification, on time, and to the highest quality standards.

Scaffolding Supply & Works

We supply and install scaffolding systems tailored to the scale and complexity of each project. Our certified teams ensure safe, compliant structures that support smooth site operations across construction, industrial, and maintenance environments.

Fence & Gate

We design and install perimeter fencing and gate systems for industrial, commercial, and residential applications. Our solutions prioritize security, durability, and compliance with site-specific requirements.

HVAC Services

Our HVAC team handles installation, maintenance, and troubleshooting of heating, ventilation, and air conditioning systems across all building types. We ensure optimal system performance and energy efficiency throughout the project lifecycle.

Security Systems

We provide integrated electronic security solutions including CCTV, access control, and building automation. Our systems are designed for reliability and scalability, protecting assets and people across commercial and industrial facilities.

Mechanical Works

Our mechanical division offers industrial maintenance, installation, and repair services using the latest tools and technology. We support continuous plant and facility operations with minimal downtime and maximum precision.

Support Services

We deliver technical support and measuring services with fast turnaround from initial inquiry through to on-site delivery. Our support teams are equipped to assist at every stage of a project, ensuring nothing stalls progress.

Fabrication

Our workshop-based fabrication facility handles custom production jobs of all sizes — designed, drafted, and detailed to client specification. We combine technical accuracy with speed to deliver fit-for-purpose components for any industry.
